Peter Edwards, Principal

September 2017

Dear Parents/Guardians:

There are students in our school who have a severe allergy to **NUTS**. Even exposure to a tiny amount of this item could be potentially serious and life threatening. We can all play a role in preventing such a dangerous and frightening situation at school. The specific child and his/her family must take responsibility to avoid exposure. However, staff, other students and their families can also help to make the school environment safer.

Yours assistance is needed to:

- please check the list of ingredients on items you send to school.
- avoid sending nuts/seeds or items containing nuts/seeds with your child to school.
- teach your child to understand this very serious situation..

This may be an inconvenience for you, but please realize how important your assistance is in this matter. We would take the same care should your child have such a health care need.

Thank you for your support. For more information, please contact the school.

Sincerely,

Peter Edwards,
Principal
